

## WASHING MACHINES

Hoover has a range of washing machines to suit the needs of all families, whether they are large or small. Each range has a selection of advanced features and utilises the latest technologies to give you the perfect solution for your home laundry requirements.

### 9kg Load

80% more capacity than traditional 5kg washers. To meet the increasingly demanding laundry needs of busy families, the VisionHD 9 can handle any size wash up to a mega 9kg load, enabling you to do more washing in fewer loads thereby freeing up your valuable time. Plus there's no need to rethink your kitchen layout as the machine fits in a standard space without protruding... Intelligent use of space from Hoover!

### 8kg Load

The VisionHD 8 can take a massive 8kg wash, which is 60% more capacity than traditional 5kg washing machines, but now fits in a smaller 85x60x54cm kitchen space.

### 7kg Load

The brand new Optima 7kg washing machine range features a unique 'teardrop' door design and innovative features which ensure design and functionality are effortlessly entwined for maximum performance.

### 6kg Load

Taking a hefty 6kg load, the Nextra 6 gives you 20% more capacity than traditional 5kg washers without compromising performance.

### 3D Dynamic Wash System

The totally redesigned VisionHD and Optima drums use increased water pressure, curved paddles and a raised dome system to move the laundry in a 3-dimensional way, providing the innovative dynamics that ensures clothes are washed to the optimum performance. The new way to wash from Hoover!

### HydroDome

The raised HydroDome profiles increase the water circulation and stop the clothes from clinging to the sides of the drum during the wash cycle. This helps to move the laundry in a 3-dimensional way during the wash cycle for more effective wash action and reduced creasing of the clothes. The convex shape of the HydroDome profiles also improves the water distribution and extraction throughout the wash cycle.

### HydroPaddle

The curved HydroPaddles work with the Hydrodome profiles to manoeuvre the laundry into the centre of the drum for better wash results. The carefully positioned holes help to disperse the water more effectively throughout the wash cycle.

### HydroPressure

Smaller and more numerous holes in the new drum achieve a higher water pressure for an all round better cleaning performance, and also enable improved water extraction during the spin cycle.

### KG Mode

The intelligent sensor weighs the laundry during the first 4 minutes of the cycle, then adjusts the cycle time, water and electricity consumption to suit the size of the load.

### Intelligent Wash System

Incorporated into all VisionHD, Optima and Nextra front loading washing machines and washer dryers, the Intelligent Wash System uses highly advanced electronic controls to constantly monitor and adjust the wash process, resulting in optimum performance throughout the cycle. The system ensures that:

- a constant temperature is maintained for better cleaning
- the spin process removes more water for quicker drying
- the drum revolves at exactly the right speed for better distribution
- the water level matches the type of fabric and size of load
- detergent is directed to the heart of the wash for better utilisation and less waste.

## WASHING MACHINES

### Intelligent Sensor

The sophisticated electronic software incorporated in the Intelligent Wash System adjusts the water level and programme length throughout the cycle according to how much laundry you load into the machine, as well as the nature of the fabrics in each wash.

### Time Manager Display

Selected VisionHD and Optima machines have an advanced Time Manager Display, that allows you to select the length of selected wash programmes (short, medium and long cycles), giving you a minute-by-minute countdown during the cycle and allows up to 23 hours delay start.

### Delay Start

This option allows you to delay the start of the wash, enabling you to arrive home just in time for when the cycle finishes rather than leave the clothes damp inside the washer. It also enables you to take advantage of cheaper-rate electricity tariffs.

### Temperature Select

Sometimes you may wish to wash your clothes at a lower temperature than the programme operates at. A variable temperature control allows you to do just that.

### Spin Select

Selected Hoover washers have the flexibility of being able to lower the spin speed depending on your washing needs.

### Countdown Display

Available on VisionHD 8 and Nextra washing machines, the Hoover Countdown Display gives an at-a-glance indication of the time remaining on any wash cycle so you can manage your time more effectively.

### Higher, Wider Porthole

VisionHD and Optima washers have an extra large 350mm porthole positioned much higher in the cabinet than traditional washing machines. This not only looks more striking but also makes loading and unloading much easier – even bulky items go in without a struggle.

### A+ Energy

All Hoover washers are now rated 'A+' for energy efficiency, combined with 'A' rated wash performance. Our 1600rpm and 1400rpm models are also 'A' rated for spin performance.

### Sensitive Care

The Sensitive Care option offers a deeper than normal water level during the wash cycle to provide gentler washing for especially delicate fabrics, while detergent is removed thoroughly with five extra rinses. Perfect for people with delicate skin, this option can be selected with all cotton and synthetic cycles.

### Stain Blaster

The Stain Blaster option, selectable on all cotton cycles, tackles stubborn stains by maintaining wash temperatures throughout the programme and adjusting the spin speed of the drum during critical stages of the wash and rinse cycles.

### Time Saver

Time Saver option saves up to 50 minutes on selected programmes.

### Fast Iron

Available on selected programmes, this cycle holds the clothes in water after the final rinse stage until you are ready to select the final spin option to complete the cycle. This reduces creasing in the clothes and enables easier ironing.

### 14min Rapid Wash

Ideal for washing a few items in a hurry.

### Daily 29min and 44min at 40°C

A quick wash for smaller loads at the most popular wash temperature.

### 59min 'A' Wash

'A' rated wash performance in under an hour.

### 'A' at 40°C

The ultimate level in wash performance and energy efficiency at the most popular wash temperature.

### Sports Cycle

Designed to deal with generally expensive fabrics which require gentleness in the wash cycle but which are liable to be dirty or stained following rigorous exercise. Provides a longer wash cycle at a low temperature.

### Woollens Cycle

This programme is dedicated to washing garments labelled with the Wool symbol.

### Silk Cycle

Ideal for washing “hand wash only” garments due to the low 30°C temperature and no final spin.

### Inverter Wash Technology

The top-of-the-range VisionHD 9 promises the quietest Hoover wash ever with our innovative inverter wash technology, an advanced brushless motor that is far quieter than conventional motors (1600rpm model only).

\* Features are available on selected products. See product specification for full details.

## 9KG WASHING MACHINES

VISIONHD VHD964ZD

## WASHER DRYERS

### Nextra 8 & 6 Washer Dryers

The Nextra range of advanced, easy to use washer dryers combines all the features of a Hoover washing machine with the convenience of a dryer and offers a choice of practical, large capacity laundry solutions.

The Nextra 8 can wash a massive 8kg load and dry an impressive 5kg, while the Nextra 6 can wash a 6kg load and dry 4kg.

Both offer spin options of up to 1600rpm plus all the advanced features of our Nextra washing machines, including the **Intelligent Wash System**, to give you the best wash ever with the minimum of effort.

### Auto Sensor Drying

All Hoover washer dryers incorporate Automatic Sensor Drying which protects your clothes and saves electricity by taking the guesswork out of setting the drying time. You simply select the degree of dryness you require and the dryer switches off automatically when it is reached. Hoover Nextra washer dryers give you the added flexibility of 3 levels of sensor drying to choose from, meeting all your drying needs. Additionally, for airing or quick drying, dryers can be set to a timed period.

### 8KG + 5KG WASHER DRYERS

NEXTRA 8+5 HNWF7148

- **8kg** Wash / **5kg** Dry
- **1400rpm** Spin

## TUMBLE DRYERS

### Sensor Dry

Selected VisionHD tumble dryers incorporate up to 4 levels of Automatic Sensor Drying, which protects your clothes from over-drying and saves electricity because you do not have to guess what the drying time will be. You simply select the degree of dryness you require and the dryer switches off automatically when it is reached.

### ‘B’ Energy

Hoover has introduced a range of ‘B’ energy condenser sensor tumble dryers, which is our highest energy rating available.

### Timed Drying Cycles

For airing or quick drying small loads, dryers can be set to a timed period.

### Fast Iron Cycle

All VisionHD dryers feature a short heated conditioning cycle that helps relax fabrics that may have been piled up or become stiff, making them easier to handle for quicker ironing.

### Refresh Cycle

Tumbling of laundry in cool air to freshen up clothes.

### Delicate Wool Finish Cycle

This short gentle cycle can be used to soften woollens after air drying or refresh those that have been stored in the wardrobe.

### Highly Efficient Reverse Action

This prevents clothes from tangling during the drying cycle and will therefore help them dry more quickly.

### ‘Filter Care’ Indicator

Lets you know when to clean the fluff filter. Not only is this good practice, it will save you time and electricity.

### Unique Hydro Dry Technology

The 8kg Hoover Hydro Dryer features a unique Hydro Dry Technology carefree system that means there is no need to empty the water container at all, as it is pumped out through your mains water supply just like a washer.

### Super Silent

The unique drying system makes the Hoover Hydro Dryer the quietest condenser on the market at only 62dB – That’s only a quarter of the noise standard condenser dryers make!\*

\*Standard condenser dryers at 67dB.

## 9KG TUMBLE DRYERS

## DISH WASHERS

### 15 Place Settings

The largest capacity dishwasher in the market, 25% bigger than standard 12 place setting dishwashers.

The lower Maxi-Flex basket has a special grid plus an adjustable central rack that enables larger and non-standard shaped plates to be loaded quickly and easily. This versatile basket can not only hold a massive 15 place settings but also accommodate large pots and pans easily.

### Dual Vertical Grip Handles

The VisionOne range are the first dishwashers to have dual vertical grip handles so the door can be opened from the left or right with minimum effort and without having to bend forward.

### 10 Litres Water Consumption

Using just 10 litres of water to wash a full load, Nextra Green uses the lowest water consumption of any dishwasher today. The water is filtered and re-circulated over 7800 times to ensure an 'A' rated wash performance.

### LED Display

A minute-by-minute guide of programme time remaining on the cycle.

### Wash Phase Indicator

This gives an at-a-glance indication of the stage the wash cycle has reached, so you can manage your time more effectively.

### Delay Start

This option allows you to delay the start of the wash, enabling you to arrive home just in time for when the cycle finishes. It also enables you to take advantage of cheaper-rate electricity tariffs.

### Easy Adjust basket

The height of the upper basket can be adjusted easily to allow larger plates to be stored in it.

### Half Load

When you only have a few items to wash, the built-in sensor adjusts the water and electricity consumption accordingly, to avoid wastage.

### 5in1 Button

Selecting this button enables the best wash performance when using 3 in 1, 4 in 1 or 5 in 1 tablets.

### Hygiene+ Cycle

The intensive 'Hygiene+' cycle eliminates 99.9% of bacteria that may be present in your dishwasher by maintaining a 75°C temperature throughout the wash and rinse phases.

### Safe Stop Baskets

This feature prevents the basket from pulling all the way out when emptying the dishwasher, therefore avoiding any accidents of dropping the basket full of crockery.

### 29 min Rapid Wash

Rapid 29 minute wash for those slightly dirty items

### AAA Rated

All Hoover Dishwashers achieve the ultimate 'AAA' rating for energy efficiency, wash and dry performance
